

Spare parts fitting instructions

Part	Handle assembly
Tools required	Phillips head screwdriver, 8mm spanner, small flat blade screwdriver
Contents	Upper and lower handle pieces

1. Unfold the buggy

2. Remove the two screws through the handle attaching the frame to the handle. An 8mm spanner may be needed underneath the handle to help undo the bolts.

3. Using a Phillips head screwdriver remove the 6 x screws underneath the handle assembly.

4. The handle assembly should easily fall apart once the screws are removed. *Be careful to no let the wiring get caught, stretched or jammed in the handle.*

5. Using a small flat blade screwdriver, remove the wire leads from the small green board noting the location of them. *The PCB has wire colours printed on it for your reference.*

6. Disconnect the speed control plug, the 2 x switch plugs and the light plug from the board noting where each plug comes from.

7. Remove the small green board with a screwdriver and transfer to the new handle piece.

8. Install the switches, speed control pot and light into the new handle piece. Reconnect the wiring noting the colour of the wires to the board.

9. Assemble the handle pieces together carefully noting the wire location and fitment.

10. Install the screws and handle bolts in reverse order as above Ensuring not to over tighten the screws and bolts.
