

Spare parts fitting instructions

| | |
|----------------|------------------|
| Part | Lower bag holder |
| Tools Required | Screwdriver |
| Contents | Lower bag holder |

1. Remove the 4 x lower bag holder screws and remove the lower bag holder from the buggy. *Note the bolt locations and washer placement.*

2. Remove the cover caps and loosen the front frame joint adjacent to the lower bag holder with 2 x 10mm spanners.

3. Line up the new lower bag holder with the frame ensuring it is the correct way up.

4. Insert and line up the screws ensuring the bolts with washers are placed in the same position.

5. Tighten the lower bag holder screws and ensure the lower bag holder is sitting correctly on the frame.

6. Tighten the frame bolt but do not over tighten the nut, just so the frame joint is solid and tight.

8. Push the caps back onto the bolt and nut heads.
