

Spare parts fitting instructions

Part	Power Bar
Tools required	10mm spanner
Contents	Power bar complete

1. Unfold the buggy
2. Remove both 10mm nuts holding the power bar unit on.
3. Remove the power bar unit and note the placement of spacers and bolt for attachment of the power bar.
4. Fit the new power bar to match the existing setup
5. Check adjustment of the frame from behind the buggy. The upper and lower frame pieces should be vertical above each other.
6. The power bar can be adjusted for length using the 10mm lock nut at each end of the power bar.
